Menu

Scanwiches

Scanwiches are served with your choice of either GUI or CLI

ScanMeNow <http://security.fnal.gov/scanmenow.html>

- A delectable combination of simplicity and convenience, ScanMeNow will satisfy your craving for information concerning possible vulnerabilities on your system.
- It comes complete with speed, ease of use, and your choice of either 'Critical', or 'All' Nessus plugins.

Beverages

Sit back and relax with our newest product

nessquik

<https://shamus.fnal.gov/nessquik>

- Run detailed vulnerability scans against your machines. It's quick, it's simple, it's name resembles a chocolaty drink
- Choose individual plugins, families of plugins, or just every plugin
- Save scans for the future
- Schedule recurring scans
- Reports come in your choice of two flavors: text or HTML

Dessert

Satisfy your sweet tooth with this soon to be available treat

Splunk

coming soon

- Think “large search engine who shall remain nameless”, for your log files.
- Provides unfair advantage in the game “lets find the needle in the haystack”
- It will take your logs, and in return, give you an easier way to search them
- Or as they put it, “All batbelt, no tights”
