

A word from your Waste Coordinator regarding: **Aerosol Cans**

Seymour Green says every little bit counts: recycle

Seymour Green, Fermilab's icon of sustainability, promotes environmentally friendly options around the laboratory.

The Fermi "Today" link write up -http://www.fnal.gov/pub/today/archive_2010/today10-08-24.html

Particle Physics Division does their part of recycling to help the environment by recycling. Beyond the basic paper, plastics and glass recycling, we also recycle **spent or unusable aerosol cans.**

So, I would like to remind everyone that aside from recycling petroleum base aerosol cans we also recycle **pesticide cans.** (See photo below). Please collect all your aerosol cans and contact me at 630-485-8060 when they are ready for pick.

Pesticide cans

Aerosol paint cans
