All this sounds very reasonable. Also VMS will stress to any of our customers who want to borrow an LCD for off site they will have to use the pool of projectors VMS has purchased and leave the Conference Office pool to on site use only.

Thanks for your help with this.

Fred,

To get back to your email one final time and to tie up the conversation you and I had in the cafeteria about these projectors:

1. We appreciate your understanding that these will be Conference Office projectors and we will give you more than sufficient notice when we need to book the equipment.
2. The Support Services Dept will take on maintenance/repair of the units or buying of new bulbs.
- 3, 4. These are fine by us - to have them assigned to Al Johnson as a sensitive item and offer assistance on setting up if needed.

In addition, I would like your confirmation that these units are NOT to leave the site because we consider them Conference Office projectors and we are covering the maintenance and repairs and cannot be responsible for how other people might treat the machines on trips, etc.

If you will add your confirmation by return email, I will begin the process in the Division Office to present this proposal to John Cooper for approval.

Thank you,

Elaine
